**Credit risk:** represents the risk associated with an issuer's sudden downgrading of its signature's quality or its default.

**Sustainability risk:** This risk is any environmental social or governance event or condition that could impact the value of investments. The Investment Manager primarily relies on its in-house ESG analysis and climate risk indicators to categorise the potential level of Sustainability risks in each Fund. The level of sustainability risk may fluctuate depending on which investment opportunities the Investment Manager identifies. This means that the Fund is exposed to Sustainability Risk which may impact the value of investments over the long term.

This is not a guaranteed investment, an investment in the Fund is different from an investment in deposits and can fluctuate in price meaning you may not get back the original amount you invested. This investment does not rely on external support for guaranteeing liquidity or stabilising the NAV per unit or share. The risk of loss of the principal is to be borne by the investor.
