Aviva Investors Sterling Government Liquidity Fund, Class 7, Accumulation shares, GBP, a sub-fund of the Aviva Investors Liquidity Funds plc (ISIN: IE00BMG74S48). The Fund is managed by Aviva Investors Luxembourg S.A.

OBJECTIVES AND INVESTMENT POLICY

The investment objective of the Fund is to offer returns in line with money market rates and to preserve the value of the investment.

The Aviva Investors Sterling Government Liquidity Fund is a Short-Term Low-Volatility Net Asset Value (LVNAV) Money Market Fund. It will seek to invest in a diversified portfolio of Sterling denominated government debt and deposits, primarily in short term government securities and securities issued by agencies or bodies explicitly guaranteed by the UK government. The portfolio will include amongst others treasury bills, UK government debt securities, repurchase agreements that are at all times fully secured against UK government securities and overnight deposits with the UK Debt Management Office.

The Fund's investments will have an average weighted maturity of 60 days or less. The maximum residual maturity until legal redemption of investments will be 397 days. The Investment Manager intends to manage the Fund according to its classification as a Short Term Money Market Fund and the restrictions imposed by the rating agencies in order to maintain an overall credit rating of Aaa (the rating has been solicited by the Investment Manager). The Investment Manager intends, where possible, to ensure that investments have the minimum ratings required to seek to achieve this. This should ensure a very high degree of safety but will reduce income compared with high risk investments. This Fund does not guarantee your money and is not the same as a deposit account.

The Fund is managed and measured with reference to a benchmark, the Overnight LIBID rate. (The London Interbank Bid Rate (LIBID) is the rate at which banks are willing to borrow from other banks.)

You can buy and sell shares on any business day in London.

This is an accumulation share class and any income from the Fund will remain in the Fund and is reflected in the share price.

RISK AND REWARD PROFILE

Lower risk

Higher risk

Typically lower rewards

Typically higher rewards

This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.

The value of investments and the income from them will change over time.

The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.

The Fund has been allocated a risk number based on the historic volatility of its share price or where insufficient information is available appropriate asset classes.

The Fund invests in money market instruments such as short term bank debt, the market prices/value of which can rise as well as fall on a daily basis. Their values are affected by changes in interest rates, inflation and any decline in creditworthiness of the issuer.

This is not a guaranteed investment, an investment in a Money Market Fund is different from an investment in deposits and can fluctuate in price meaning you may not get back the original amount you invested. This investment does not rely on external support for guaranteeing liquidity or stabilising the NAV per unit or share. The risk of loss of the principal is to be borne by the investor.

Full information on the risks applicable to the Fund is detailed in the Prospectus.
