

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Aviva Investors - Global Convertibles Absolute Return Fund, Class I, Accumulation shares, USD, a sub-fund of Aviva Investors (ISIN: LU0459997697). The Fund is managed by Aviva Investors Luxembourg S.A.

OBJECTIVES AND INVESTMENT POLICY

Objective: The objective of the Fund is to earn a positive return on the Shareholder's investment regardless of market conditions (absolute return), while outperforming the SOFR (Secured Overnight Financing Rate) benchmark over the long term (5 years or more).

Investment Policy: The Fund mainly seeks exposure to convertible bonds from anywhere in the world.

Sustainability Disclosures: This Fund promotes environmental and social characteristics however does not have a sustainable investment objective. To be eligible for investment, all investments that are selected as part of the Investment Manager's ESG analysis must follow good governance practices and not be excluded by the Investment Manager's ESG Baseline Exclusions Policy. The Investment Manager actively engages with companies and uses voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. The Investment Manager integrates qualitative and quantitative data on adverse sustainability impacts into its investment processes. The Fund does not make any minimum commitment to invest in one or more environmentally sustainable investments. Further information regarding how the Investment Manager integrates ESG into its investment approach (including information on its ESG Baseline Exclusions Policy) and how it engages with companies is available in the Responsible Investment Philosophy section and on the website www.avivainvestors.com.

Derivatives and Techniques: The Fund may use derivatives for investment purposes to create both long and synthetic covered short positions on equity related securities. The Fund may also use derivatives for hedging, mainly hedging equity and credit exposure, and efficient portfolio management. **Securities lending:** Expected level: 10% of total net assets; maximum: 20%. Underlying securities in scope: limited to assets permitted by the Fund's investment policy.

Total Return Swaps (including contracts for difference): Expected level: 50% of total net assets; maximum: 100%. Underlying securities in scope: convertible securities and equities

Benchmark (performance comparison): The Fund's performance is compared and the Fund aims to outperform the SOFR (Secured Overnight Financing Rate), which has been chosen as the market standard indicator of the risk-free rate of return, however the reference benchmark is not aligned with all of the environmental or social characteristics promoted by the Fund.

The Investment Manager actively makes the investment selection decisions for the Fund.

Other information: You can buy and sell shares on demand on any full bank business day in Luxembourg.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

This is an accumulation share class and any income from the Fund will remain in the Fund and is reflected in the share price.

For full investment objectives and policy details please refer to the Prospectus.

RISK AND REWARD PROFILE

Lower risk

Typically lower rewards

Higher risk

Typically higher rewards

This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean that the investment is 'risk free'.

The value of investments and the income from them will change over time.

The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.

The Fund has been allocated a risk number based on the historic volatility of its share price or where insufficient information is available appropriate asset classes.

Currency risk: Changes in currency exchange rates could reduce investment gains or increase investment losses. Exchange rates can change rapidly, significantly and unpredictably.

Market risk: Prices of many securities (including bonds, equities and derivatives) change continuously, and can at times fall rapidly and unpredictably.

Counterparty risk: The Fund could lose money if an entity with which it does business becomes unwilling or is unable to meet its obligations to the Fund.

Derivatives risk: Derivatives are instruments that can be complex and highly volatile, have some degree of unpredictability (especially in unusual market conditions), and can create losses significantly greater than the cost of the derivative itself.

Illiquid securities risk: Certain assets held in the Fund could, by nature, be hard to value or to sell at a desired time or at a price considered to be fair (especially in large quantities), and as a result their prices could be very volatile.

Credit risk: A bond or money market security could lose value if the issuer's financial health weakens.

Below investment grade bonds (also known as high yield securities) typically have greater credit risk than investment grade securities.

Interest rate risk — bonds: When interest rates rise, bond values generally fall. This risk is generally greater for longer-term bonds and for bonds with higher credit quality.

Default risk: Issuers of certain bonds or money market instruments could become unable to make payments on their bonds, causing a reduction in income to the Fund and also in the value of bonds held by the Fund. Under extreme market or economic conditions, defaults could be widespread and their effect on Fund performance significant.

Hedging risk: Any measures taken to offset specific risks will generate costs (which reduce performance), could work imperfectly or not at all, and if they do work will reduce opportunities for gain.

Leverage risk: A small price decline on a "leveraged" underlying investment will create a correspondingly larger loss for the Fund. A high overall level of leverage and/or unusual market conditions could create significant losses for the Fund.

Sustainability risk: The level of sustainability risk to which the Fund is exposed, and therefore the value of its investments, may fluctuate depending on the investment opportunities identified by the Investment Manager.

Convertible bonds risk: Convertible bonds could earn less income than comparable debt securities and less growth than comparable equity securities, and carry credit, default, equity, interest rate, liquidity and market risks.

Full information on the risks applicable to the Fund is detailed in the Prospectus.

CHARGES

One-off charges taken before or after you invest*

Entry charge	5.00%
Exit charge	None

Charges taken from the Fund over a year

Ongoing charges	0.86%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	10.00% out-performance of the Fund's net positive return, 0.00% for the year to 31/12/2021.
-----------------	---

*This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases (including when switching to other funds or share classes in Aviva Investors) you might pay less – you can find the actual entry and exit charges from your financial adviser/distributor.

The ongoing charges figure is based on last year's expenses for the year ending December 2023. The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

A switching charge of up to 1% may be applied when switching to other funds or share classes in Aviva Investors.

For more information about charges, including a full explanation of any performance fee (if applicable) please see the charges sections of the Fund's Prospectus.

PAST PERFORMANCE

Past performance is no guide to future performance.

The past performance shown in the chart opposite takes into account all charges except entry charges.

The Share Class was launched on 16 December 2009.

Performance is calculated in the Share Class currency which is USD.

Source: Aviva Investors/Morningstar as at 31 December 2023.
