RISK AND REWARD PROFILE

- This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.
- The value of investments and the income from them will change over time.
- The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.
- The Fund has been allocated a risk number based on the historic volatility of its share price or where insufficient information is available appropriate asset classes.
- **China country risk:** changes in China's political, legal, economic or tax policies could cause losses or higher costs for the Sub-Fund.
- **Counterparty risk:** The Fund could lose money if an entity with which it does business becomes unwilling or is unable to meet its obligations to the Fund.
- **Currency risk:** Changes in currency exchange rates could reduce investment gains or increase investment losses. Exchange rates can change rapidly, significantly and unpredictably.
- **Derivatives risk:** Derivatives are instruments that can be complex and highly volatile, have some degree of unpredictability (especially in unusual market conditions), and can create losses significantly greater than the cost of the derivative itself.
- **Hedging risk:** Any measures taken to offset specific risks will

generate costs (which reduce performance), could work imperfectly or not at all, and if they do work will reduce opportunities for gain.

- **Illiquid securities risk:** Certain assets held in the Fund could, by nature, be hard to value or to sell at a desired time or at a price considered to be fair (especially in large quantities), and as a result their prices could be very volatile.
- **Leverage risk:** A small price decline on a "leveraged" underlying investment will create a correspondingly larger loss for the Fund. A high overall level of leverage and/or unusual market conditions could create significant losses for the Fund.
- **Stock Connect risk:** The Sub-Fund may be investing in China A-Shares via the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect which may entail additional clearing and settlement, regulatory, operational and counterparty risks.
- **Multi-strategy risk:** Because the Fund is exposed to the risks of multiple markets and asset classes, there is a risk that some or all of its strategies may not perform or correlate as expected.
- Full information on the risks applicable to the Fund is detailed in the Prospectus.
