Central Bank of Ireland is responsible for supervising Summit Asset Managers Limited in relation to this Key Information Document. This PRIIP is authorised in Ireland.

The Key Information Document (KID) is accurate as at 01 December 2023.

You are about to purchase a product that is not simple and may be difficult to understand.

WHAT IS THE PRODUCT?

Type:

The fund is a sub-fund of Beresford Funds ICAV (the "ICAV"), an open-ended umbrella type Irish collective asset-managed vehicle with variable capital, with segregated liability between its sub-funds and is established as an Undertaking for Collective Investment in Transferable Securities (UCITS).

Term: The product has no fixed term. The fund may be terminated at any time in line with the constitutional documents of the ICAV.

Objectives:

The objective of the fund is to grow the value of your investment over the medium-term.

The fund is actively managed and aims to achieve its objective by investing mainly in shares of companies around the world, as well as fixed and/or floating rate debt securities issued by governments or companies and cash. All investments must adhere to ethical criteria which may exclude investment in companies that participate in particular industries, eg. manufacture of armaments or tobacco products.

The fund's exposure to emerging market countries (countries considered to have social or business activity in the process of rapid growth) may exceed 20% of its net assets. Investment in shares listed or traded on a Russian exchange is not expected to exceed 20% of the fund. The fund may invest up to 100% of its net asset value in derivatives (complex financial instruments) such as index future contracts, forwards and options. These instruments may be used by the fund to gain exposure to the underlying security, to reduce the fund's exposure to a security/ currency or to generate

income for the fund. The derivatives return is linked to movements in the underlying asset.

The performance of the fund is monitored relative to a composite benchmark of the MSCI World Net Euro Index (representing 70% of the composite benchmark) and the ECAS Index (representing 30% of the composite benchmark). Investment decisions are not constrained by the benchmark and the fund does not track the benchmark.

The fund is an accumulating fund. Income, earnings and gains of the fund will be accumulated and reinvested on behalf of shareholders.

This fund deals daily. Upon request to the Administrator, you can sell shares in the fund on any business day (days that the banks are normally open for business) in Ireland.

Intended Investor: The fund is intended for retail investors who have obtained appropriate investment advice and have the ability to bear losses up to the amount invested in the fund. Investment in the fund may be suitable for investors with a medium-term investment horizon.

The Depositary for the fund is Citi Depositary Services Ireland Designated Activity Company.

Other practical information can be found in the prospectus. Copies of the prospectus and the latest annual and half yearly report in English are available free of charge on <https://setanta-asset.com/ucits/>

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

The risk indicator assumes you keep the product for 5 Years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. The actual risk can vary significantly if you cash in at an early stage and you might get back less than you invested.

We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level and poor market conditions could impact the capacity of the fund to pay you.

Be aware of currency risk. The fund may receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

For a detailed explanation of the risks the fund is subject to, some of which are not included in the calculation of this risk indicator, please refer to the 'Risk Factors' section of the prospectus.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

WHAT HAPPENS IF SUMMIT ASSET MANAGERS LIMITED IS UNABLE TO PAY OUT?

The Depositary holds the assets of the fund in safe keeping and is required by law and regulation to segregate the fund's assets from its own assets. In the event of insolvency of Summit Asset Managers Limited, the fund's assets will be unaffected. In the event of insolvency of the Depositary, the fund may suffer a financial loss however, this loss is mitigated to certain extent by the segregation of the assets. The Depositary is liable to the fund for losses arising from negligence or intentional failure to properly fulfil its obligations pursuant to the UCITS Regulation (subject to certain limitations). There is no compensation or guarantee scheme for investors in the fund.

WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

| Investment: 10 000 EUR | If you exit after 1 Year | If you exit after 5 Years |
|------------------------|--------------------------|---------------------------|
| Total Costs | 585 EUR | 1004 EUR |
| Annual Cost Impact* | 5.85 % | 1.7 % |

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.05% before costs and 3.35% after costs.

Composition of Costs

| 1 Year | | |
|--|---|---|
| One-off costs upon entry or exit | Entry costs | 2.00% The entry charges shown is the maximum figure. In some cases you might pay less – you can find this out from your financial advisor. The ICAV does not currently apply an entry charge. 200 EUR |
| | Exit costs | 3.00% The exit charges shown is the maximum figure. In some cases you might pay less – you can find this out from your financial advisor. The ICAV does not currently apply an exit charge. 309 EUR |
