

**Key Investor Information Document:** This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## Barings Global Bond Fund (the "Fund") a sub-fund of Barings International Umbrella Fund (the "Umbrella Fund") Class A RMB Hedged Inc Monthly Dividend - ISIN No. IE00B7JYQK32 (the "Share Class")

The Fund is a Unit Trust. Baring International Fund Managers (Ireland) Limited is the Manager of the Fund.

### OBJECTIVE AND INVESTMENT POLICY

**Objective:** To seek a maximum total return, through current income generation and capital appreciation.

**Investment Policy:** The Fund invests primarily in an actively managed globally diversified portfolio which at least 80% of its Net Asset Value is invested in fixed income instruments.

The fixed income instruments in which the Fund invests may include government bonds, covered bonds, global corporate bonds, notes, debentures, government obligations and sovereign issues, commercial paper, asset-backed securities ("ABS"), commercial and residential-mortgage backed securities ("CMBS" and "RMBS"). The Fund may invest in investment grade and up to 50% of the Fund's Net Asset Value in sub-investment grade fixed income instruments; up to 25% of its Net Asset Value in collateralised and/or securitised products such as covered bonds, ABS, CMBS and RMBS; and up to 10% of its Net Asset Value in securities issued and/or guaranteed by a single sovereign (including its government, a public or local government of that country) which is rated sub-investment grade. An investment grade fixed income security is one which carries a lower (but not zero) degree of risk than sub-investment grade fixed income securities, as such investment grade fixed income securities typically carry a lower rate of interest than higher yielding fixed income securities.

The Fund may use derivative instruments for both investment and hedging purposes. The return on a derivative is linked to movements in an underlying instrument referenced by the derivative such as currency or interest rates. The base currency of the Fund is USD.

**Share Class Currency Hedging:** This share class engages in currency hedging using derivative instruments to seek to limit the shareholder's currency risk by reducing the effect of foreign exchange rate fluctuations between the share class currency and the base currency of the Fund.

**Distribution Policy:** Income will be declared and distributed as a dividend monthly.

**Dealing Frequency:** Daily. Investors can buy and sell their shares on demand on each Business Day (as defined in the prospectus).

**Benchmark:** FTSE World Government Bond Index'. The Fund is actively managed and is not designed to track the Benchmark so its performance may deviate materially from the Benchmark. The investment manager will manage global exposure of the Fund to within 200% of the Benchmark's value-at-risk ("VaR"). The VaR of a Fund is a daily estimation of the maximum loss which a Fund may incur over a 1 day period. The investment manager has complete discretion in making investments and is not otherwise constrained by the Benchmark. The Fund may invest significantly in instruments which are not included in the Benchmark. As well as this, the Benchmark is used only for risk management and performance comparison purposes. The investment manager may consider, for example, issuer exposures, duration, sector weights, country weights, credit ratings and tracking error in each case relative to the Benchmark but (other than as set out above) does not use the Benchmark as an investment limitation.

**For further details please refer to the prospectus and supplement.**

### RISK AND REWARD PROFILE

The risk number is based on the rate at which the value of the simulated data of the Fund has moved up and down in the past, and is an indicator of absolute risk.

- Historical and simulated data may not be a reliable indicator for the future
- The Fund's ranking is not guaranteed and may change over time
- The lowest risk category does not mean the investment is risk free
- The Fund is categorised as a 4 for the purposes of this table due to the nature of its investments
- The value of investments and the income may go down as well as up and investors may not get back the amount they invest

**The following risks may not be captured by the risk and reward indicator:**

- During exceptional market conditions there may be insufficient buyers and sellers to allow the Fund to buy and sell investments readily which could affect the Fund's ability to meet investors' redemption requests

- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
- Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Fund's value rises and falls and could expose the Fund to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Changes in exchange rates between the currency of the Fund and the currencies in which the assets of the Fund are valued can have the effect of increasing or decreasing the value of the Fund and any income generated.
- Debt securities are subject to risks that the issuer will not meet its payment obligations (ie, default). Low rated (high yield) or equivalent unrated debt securities of the type in which the Fund will invest generally offer a higher return than higher rated debt securities, but also are subject to greater risks that the issuer will default.
- There are greater risks investing in emerging markets than in developed markets due to economic, political or structural challenges and the Fund may be required to establish special custody arrangements in certain markets before investing.
- A more complete description of the risk factors is set out in the prospectus under "Risk Considerations" and in the supplement for the Fund.

## CHARGES FOR THIS FUND

The charges you pay are used to pay the costs of running the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	1.21%
Charges taken from the Fund under specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges and may vary from year to year. An estimate has been used as it provides a more accurate figure. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

The Fund will incur portfolio transaction costs which are paid from the assets of the Fund.

For more information on charges, please refer to the relevant sections of the Prospectus.

## PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The performance shown is based on the net asset value, after the deduction of all ongoing charges and portfolio transaction costs, with distributable income reinvested.
- The Fund launched in 1978. The Share Class launched in 2021. The chart shows past performance of the Share Class and of the Benchmark for all full calendar years available since the share class was launched.
- The past performance calculation does not take into account the entry and exit charges but does take into account all other ongoing charges.
- The Fund is not designed to track the Benchmark.
