

KEY INVESTOR INFORMATION

Eaton Vance International (Ireland) Emerging Markets Local Income Fund (the "Fund")

a sub fund of Eaton Vance International (Ireland) Funds plc (the "Company")

Class S Acc USD (IE00BFX4DJ33) (the "Share Class")

Managed by MSIM Fund Management (Ireland) Limited (the "Manager")

Objectives and Investment Policy

The Fund aims to generate total return, being income and capital appreciation.

The Fund will invest in fixed income securities denominated in currencies of emerging market countries and fixed income securities issued by emerging market corporates or emerging market sovereign nations. Such fixed income securities will be listed, traded or dealt on Recognised Markets and may include sovereign bonds and debentures, mortgage-backed securities and asset-backed securities, convertible debt securities, municipal obligations, corporate bonds and debentures, and debt securities. Such instruments may be rated below investment grade or be unrated.

The Fund is not intended to have a particular sector or industry focus.

The Investment Adviser will incorporate environmental, social and governance ("ESG") criteria and assessments in the investment process in order to contribute to the specific environmental or social characteristics promoted by the Fund.

The Fund will also invest in derivative instruments for investment purposes, efficient portfolio management or hedging purposes. Such derivative instruments may include forward foreign currency exchange contracts; futures on securities, indices, currencies and swaps; options; and interest rate swaps, cross-currency swaps, total return swaps and credit default swaps.

The Fund is actively managed in reference to the JPMorgan Government Bond Index: Emerging Market (JPM GBI-EM) Global Diversified (unhedged) Index (the "Index"). The Fund targets a tracking error (ie the difference between the Fund's returns and those of the Index) relative to the Index of between 150 and 350 basis points and a 200 basis point return above the Index and the Investment

Adviser has also set guidelines in respect of duration, volatility, correlation and beta relative to the Index. The Fund does not intend to track the Index, however, and a significant portion of the Fund's investments may not be Index constituents at any given time.

The Fund will utilise the Index for risk management purposes. The Investment Adviser will manage global exposure of the Fund to within 200% of the Index's value-at-risk ("VaR")*

In certain circumstances, the Fund may hold cash and/or other assets which can be easily converted into cash.

Currency forwards (which are agreements to buy or sell currency at the exchange rate on the contract date but to deliver the currency on a specified future date) may be used to hedge (or reduce the currency risk of investment in) the non U.S. Dollar Shares.

The Fund may also invest in equities and collective investment schemes.

Any income earned on investments will be added to the value of the Fund.

You can buy and sell your shares daily during Fund business hours.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 3 to 5 years.

*The VaR of a fund is a daily estimation of the maximum loss which a fund may incur over a 1 day period.

Risk and Reward Profile

The risk rating of the Share Class is calculated using a standard methodology used by all UCITS funds, and shows where the Share Class ranks in terms of its relative risk and potential return based on past share price fluctuation.

The Share Class has a risk rating of 5 because of past rises and falls in its value of a comparable index. The Fund may also have high exposure to a single market, region or currency and therefore may be more sensitive to any localised events and thus subject to greater risk over time.

Using such past information may not reliably predict how the Share Class will perform in the future.

Its ranking is not guaranteed and may change over time. The lowest risk class does not mean the investment is risk free.

The following risks may not be captured by the risk and reward indicator:

- The value of investments and income from them can go down as well as up and you may not get back the full amount you invested.

- Debt securities are subject to risks that the issuer will not meet its payment obligations. Some of the debt securities held by the Fund may be subject to increased risks of this nature and may be regarded as being speculative.
- Use of FDIs is highly specialised and investing in FDIs is speculative. The loss on FDIs may exceed the amount invested and may have a negative effect on your investment. Risks associated with FDIs include the risk that the other party with which the Fund enters into an FDI will not meet its payment obligations.
- Investments in emerging market countries can be considered speculative. Emerging markets may have greater economic, political, regulatory and infrastructure risks than developed markets. Investment risk may be concentrated in certain markets, regions or currencies.
- At times there may be insufficient buyers and sellers to allow the Fund to buy and sell investments readily.
- Many people, processes and systems are involved in operating the Fund, and these could fail and cause a loss to your investment or a failure to return property of the Fund.
- The Fund may or may not hedge currency exposure against the U.S. Dollar in its underlying investments. Changes in exchange rates may lead to fluctuations in the value of your investment.
- A more complete description of the risk factors is set out in the prospectus and in the supplement for the Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested/the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charge	0.48 %
Charges taken from the Fund under specific conditions	
Performance fee	None

Any entry or exit charges shown are the maximum figures. In some cases you might pay less. You should refer to your financial advisor for more details.

The ongoing charge is based on the previous year's expenses for the year ending December 2021. This figure may vary from year to year. It excludes portfolio transaction costs.

You can find out more details about the charges by looking at the prospectus in the sections headed "Fees and Expenses".

Past Performance

Past performance is not a reliable indicator of future results.

The past performance takes account of all charges and costs, except for any entry or exit charges.

The value of this Share Class is calculated in U.S. Dollars.

The Fund was launched on 21 December 2017 and this Share Class commenced on 1 February 2018.

The Fund is not designed to track the Index.
