

Manulife Global Fund

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Dragon Growth Fund a sub-fund of Manulife Global Fund Class I5 Acc LU2225685366

Management Company: Manulife Investment Management (Ireland) Limited

Objectives and Investment Policy

Dragon Growth Fund aims to achieve capital growth by investing at least 70% of its net assets in a diversified portfolio of equity and equity related securities of public companies which are listed in Hong Kong and/or, although not listed in Hong Kong, are listed on a stock exchange in any other jurisdiction and have substantial business interests in Hong Kong and/or China. Such equity and equity related securities include common stocks, preferred stocks and depositary receipts. While the Sub-Fund will invest in accordance with its investment objective and strategy, subject to applicable laws and regulations, the Sub-Fund is not otherwise subject to any limitation on the portion of its net assets that may be invested in any one country or sector and in issuers of any market capitalisation. Hence, the Sub-Fund may invest more than 30% of its net assets in issuers located in any of the People's Republic of China (the "PRC") and Hong Kong, and due to the nature of the investment portfolio of the Sub-Fund, securities of small and medium sized companies may represent, at times, more than 30% of the net assets of the Sub-Fund. The Sub-Fund's investments may be denominated in any currency.

The Sub-Fund may invest directly in certain China A shares listed on the Shanghai Stock Exchange ("SSE") or the Shenzhen Stock Exchange ("SZSE") via the Shanghai-Hong Kong Stock Connect programme or the Shenzhen-Hong Kong Stock Connect programme respectively (collectively "Stock Connect"). In any event where the Sub-Fund invests in China A shares, it is expected that the Sub-Fund will not hold 30% or more of its net assets in China A shares.

Risk and Reward Profile

The risk indicator above is based on historical data and may not be a reliable indication of the future risk profile of the Share Class. The risk category shown is not guaranteed and may change over time. The risk indicator is a measure of the Share Class' price movement (volatility) over time, and shall help investors understand the possibilities for losses or for gains that may affect their investment. A Share Class with the lowest risk rating does not mean a 'risk-free' investment.

This Share Class is in category **6** as it mainly invests in Hong Kong equity securities; these investments have shown high price fluctuations historically. The value of the Share Class may rise and fall accordingly.

In addition to the risk indicator, the Sub-Fund may also be subject to the following risks:

Investment Risk: The Sub-Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses.

Natural Resources Sector Risk: By focusing on the natural resources sector, some Sub-Funds carry much greater risks of adverse developments than a Sub-Fund that invests in a wider variety of industries. The securities of companies in the natural resources sector may experience more price volatility than securities of companies in other industries.

Small Cap Risk: Investments in securities of small and medium sized companies may involve greater risk than is customarily associated with investment in larger and more established companies. In particular, smaller companies often have limited product lines, markets or financial resources, with less research information available about the company, and their management may be dependent on a few key individuals.

The Sub-Fund may use financial derivative instruments, which are financial instruments linked to the value of underlying assets. Derivatives may be used for investment purposes as well as for the purposes of managing risk and to manage the Sub-Fund more efficiently. No dividends will be paid in respect of this Share Class.

The Sub-Fund pursues an actively managed investment strategy and uses the MSCI AC Zhong Hua NR USD index as a Benchmark for performance comparison purposes only. The Investment Manager will invest in an unconstrained manner, relative to the Benchmark, under normal market conditions and has the discretion to invest in securities not included in the Benchmark. From time to time, depending on market conditions and the Investment Manager's forward-looking expectations, the Sub-Fund's investment strategy may invest in a universe of securities that are similar to that of the constituents of and, as a result, have characteristics similar to the Benchmark.

You can sell the shares you hold in the Sub-Fund on any day on which banks in Luxembourg are open for business other than (i) any day on which any exchange or market on which a substantial portion of the Sub-Fund's investments is traded in accordance with the Sub-Fund's investment objective and policy is closed, or (ii) such other day(s) as the directors of Manulife Global Fund may determine.

Geographical Concentration Risk: The concentration of the Sub-Fund's investments in Hong Kong-related or PRC-related companies may result in greater volatility than portfolios which comprise broad-based global investments.

People's Republic of China Investment Risk: Investing in the securities markets in Mainland China is subject to the risks of investing in emerging markets generally as well as to specific risks relating to the Mainland China market. Investing in Mainland China-related companies involves certain risks and special considerations not typically associated with investment in more developed economies or markets, such as greater political, tax, foreign exchange, liquidity and regulatory risk.

People's Republic of China Tax Risk: The Sub-Fund may be exposed to risks associated with changes in current Chinese tax laws, regulations and practice, which may have retrospective effect.

Investments via Stock Connect: Investment in Stock Connect securities is subject to various risks associated with the legal and technical framework of Stock Connect. The current Stock Connect regulations are subject to change, which may take retrospective effect. Accordingly, there can be no assurance that the Sub-Fund will be able to obtain investment opportunities through the two-way stock trading link.

Liquidity Risk: This Sub-Fund will invest a portion of its assets in comparatively less liquid assets/securities, therefore, the Sub-Fund's investments may become difficult to sell for full value or at all, which could affect performance and could result in delays when you sell your shares.

Use of Financial Derivative Instruments (FDIs): The Sub-Fund may use FDIs for investment purposes as well as to manage risk and manage the Sub-Fund more effectively. The use of derivatives exposes the Sub-Fund to additional risks, including; volatility risk, management risk, market risk, credit risk and liquidity risk.

For a more detailed explanation of risks, please refer to the "General Risk Factors" section and "Appendix I" of the Prospectus.

Charges

These charges are used to pay the costs of running the Share Class. Overall, they reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charge	1.02 %
----------------	--------

Charges taken from the fund under specific conditions

Performance fee	None
-----------------	------

The charges shown are the maximum figures. In some cases you might pay less. For more information about charges, please see the Fees and Charges section in the Prospectus or seek independent advice.

The ongoing charge is based on the previous year's expenses for the year ending December 2023. This figure may vary from year to year.

A switching charge of up to 1.00% may be applied if you switch your shares to the shares of another sub-fund.

Past Performance

Past performance is not a reliable indicator of future results.

The past performance takes account of all charges and costs.

The performance of the class is calculated in USD.

The Sub-Fund launched on 20 December 1996. This Share Class started to issue shares on 21 December 2020.
