NN (L) Euro Short Duration - Z Cap EUR

ISIN: LU1738490959

A sub-fund (hereafter referred to as the fund) of NN (L)

This fund is managed by NN Investment Partners B.V.

Objectives and Investment Policy

The fund offers an alternative to short term money markets funds and to fixed income funds (funds that invest in fixed income instruments) as it has a weighted average maturity (duration) of its investments between 1 and 3 years. The fund uses active management to invests in short term fixed income instruments such as Government (guaranteed) bonds, bonds with variable interest rates and corporate bonds, with bond, sector and country deviation limits maintained relative to the benchmark. The fund positioning can therefore materially deviate from the benchmark. Measured over a period of several years we aim to beat the performance of the benchmark JPMorgan EMU Government Investment Grade Index 1-3 years. The

benchmark is a broad representation of our investment universe. The fund may also include investments into securities that are not part of the benchmark universe. All instruments have a high quality (investment grade rating) and are denominated in Euro. We add value by forming a view on the evolution of interest rates, and acting on that view. In addition we selectively take positions in attractively priced credit instruments. You can sell your participation in this fund on each (working) day on which the value of the units is calculated, which for this fund occurs daily. The fund does not aim to provide you with a dividend. It will reinvest all earnings.

bonds used to reach the investment objective is considered medium. Bonds are impacted by various factors.
