Insight Investment UK Corporate Long Maturities Bond Fund: Gross S Accumulation Shares A sub-fund of Insight Investment Discretionary Funds ICVC

ISIN: GB00B06FXK91

This Fund is managed by Insight Investment Funds Management Limited

Objectives and Investment Policy

The Fund aims to generate a return, comprising both income and capital growth, that exceeds the return of the iBoxx GBP Non-gilts Over 10 Years Index (the Fund's Benchmark) by 1% per year over a rolling five year period before the deduction of tax, management charges and expenses (the "Target Return"). In seeking to achieve its objective, the Fund will invest at least 50% of its assets directly (i.e. excluding the effect of any exposure obtained via derivatives) in Sterling denominated conventional bonds issued by entities other than the UK government. While the Fund will invest at least 50% in such instruments, typically, this could be substantially higher.

The Fund's benchmark is comprised of securities with maturities of over 10 years. While the Investment Adviser will have regard to the fact that the objective of the Fund is expressed by reference to the Fund's benchmark, the Fund is actively managed, meaning the Investment Adviser has a high level of discretion in the selection of investments and may invest in securities that are not included in the Fund's benchmark. The balance of the Fund's assets may be invested to varying degrees in bonds other than those referred to above, loans, collective

investment schemes (including those managed by Insight Investment Funds Management Limited or its associates), deposits, cash and near cash instruments, other transferable securities, money market instruments, repurchase agreements, reverse repurchase agreements, derivatives and forward transactions.

The Fund may invest directly, or indirectly, in sub-investment grade bonds and contingent convertible bonds up to a combined limit of 25% of its assets.

Derivatives may be used for efficient portfolio management as well as for meeting the investment objective of the Fund.

This Fund may not be appropriate for investors who plan to withdraw their money within five years.

This share class does not pay a dividend. Any income arising is retained in the Fund and reflected in the value of the share class.

Shares can be bought from and sold back to the Fund on any business day in the United Kingdom.

Please refer to the "Investment Objectives and Policies" section of the Prospectus for more detailed information.

Risk and Reward Profile

Lower risk ← Higher risk
Potentially lower reward Potentially higher reward

- This indicator is based on historical or simulated data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund is ranked in risk and reward category 4 as it invests in bonds, which tend to be more volatile than cash. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. The Fund is also

subject to the following risks which are not included in the calculation of the risk-reward indicator.

The Fund may use derivatives for investment purposes. Derivatives are inherently volatile and a small movement in the price of the underlying investment may result in a large impact on the price of the Fund. Whilst the use of derivatives is not intended to cause larger, more frequent changes in the Fund price or increase its risk profile, the Fund may be exposed to additional risks and costs as a result.

The Fund may hold over 35% of its net asset value in securities of one governmental issuer. The value of the Fund may be profoundly affected if one or more of these issuers fails to meet its obligations or suffers a ratings downgrade.

The Issuer of a debt security held by the Fund may not pay income or repay capital to the Fund when due.

The Fund may invest in instruments which can be difficult to sell when markets are stressed.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
