ILF GBP Liquidity Plus Fund: Class 5 Shares
A sub-fund of Insight Liquidity Funds plc

ISIN: IE00B0L53378

This Fund is managed by Insight Investment Management (Europe) Limited

Objectives and Investment Policy

The Fund aims to provide investors with stability of capital and income through investment in short term fixed income and variable rate securities. The Fund's benchmark is Sterling Overnight Index Average (SONIA). The Fund aims to outperform SONIA by 0.25% per annum (before tax, fees and expenses). However, a positive return is not guaranteed and a capital loss may occur.

The Fund will invest in:

- fixed income bonds
- floating rate bonds (bonds that pay a variable, rather than a fixed interest rate), including mortgage backed (and other asset-backed) securities
- various types of money-market instruments, including bank deposits, certificates of deposit and commercial paper.

An asset-backed security (ABS) is a bond the returns of which are derived from and backed by a specified pool of underlying assets. ABS are generally issued by financial institutions and have a variable interest rate. The Fund will not invest in a money-market instrument unless it has a rating of at least A1 or any bond with a rating of less than A- from a recognised rating agency at the time of purchase. It will not invest in floating rate bonds with a remaining maturity of more than ten years, or any other security or instrument with a remaining maturity of more than five years. Most instruments and securities that the Fund invests in will be issued by companies, including financial institutions. In normal market

conditions, the Fund will invest a minimum of 20% of its Net Asset Value in securities, instruments and obligations with a maturity over two years.

The Fund will mainly invest in sterling-denominated assets. Where it does invest in assets denominated in other currencies, it will hedge (or translate) exposure back to sterling using appropriate derivative instruments.

The Fund is actively managed meaning the Investment Manager has a high level of choice as to how to make investments for the Fund. When assessing different investments the Investment Manager will compare their risk, return and maturity profile against those of assets offering the benchmark return.

Class 5 Shares pay a dividend. Dividends will be re-invested on a monthly basis in additional shares, unless investors specifically request that they be paid by electronic transfer.

Shares can be bought from and sold back to the Fund on any business day in the United Kingdom.

The GBP Liquidity Plus Fund is not a Money Market Fund and has not been authorised in accordance with the Money Market Fund Regulation (Regulation (EU) 2007/1131 of the European Parliament and of the Council).

Risk and Reward Profile

Lower risk ← Higher risk
Potentially lower reward ← Potentially higher reward

- This indicator is based on historical or simulated data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund is ranked in risk and reward category 1 as it invests in bonds, which tend to be less volatile than equities.

The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. The Fund is also subject to the following risks which are not included in the calculation of the risk-reward indicator.

The Fund may hold over 35% of its net asset value in securities of one governmental issuer. The value of the Fund may be profoundly affected if one or more of these issuers fails to meet its obligations or suffers a ratings downgrade.

The issuer of a debt security held by the Fund may not pay income or repay capital to the Fund when due.

Subscription for shares in the Fund does not offer the same level of security as investing in a deposit account with a bank. The value of shares is not insured or guaranteed and the principal invested is capable of fluctuation.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
