

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Insight Emerging Markets Debt Fund: Class S Sterling Income A sub-fund of Insight Global Funds II plc

ISIN: IE00B1W58836

This Fund is managed by Insight Investment Management (Europe) Limited

Objectives and Investment Policy

The Fund aims to provide positive absolute returns, comprising both income and capital growth, on an annual basis by investing principally in emerging markets debt. It should be noted that this objective is not guaranteed but rather depends upon the Investment Manager's skill in selecting appropriate investments as described below. The Fund's benchmark is 3 month sterling Libid.

The Fund seeks to achieve its objective primarily by investment in a broad range of emerging market debt (bonds and other debt-related instruments) and derivative instruments:

- in this context emerging market debt means either that the issuer is based in an emerging market or that the debt concerned provides exposure to an emerging market
- most emerging market debt that the Fund buys will be local market debt – debt based in a country's own currency rather than, say, US dollars
- the Fund invests in investment grade bonds and high yield bonds. High yield bonds are generally riskier than investment grade bonds, but in return pay more income.
- debt issuers include governments, companies (including financial institutions) and supranational or public international bodies, with governments typically being the most common type of issuer held within the portfolio.

The Fund will also invest in cash and other cash-like investments (including money market instruments) and, bearing in mind the objective of the Fund, from time to time such investment may be significant. The Investment Manager has a high level of choice as to how to make investments for the Fund and will also use a wide range of derivative instruments. This will usually be where it believes they offer a more effective way of investing than investing directly in debt instruments or to manage and/or hedge out (or minimise) credit, currency and other risks. Derivatives can be used to reduce risk in the portfolio including non-sterling currency risk.

The success of these strategies will depend upon the accuracy of the Investment Manager's views. When the Investment Manager is not able to identify investment opportunities offering gains relative to its benchmark, it will instead remain invested in cash investments. This Fund may not be appropriate for investors who plan to withdraw their money within five years.

Class S Sterling Income Shares are income shares. This means that income from the Fund's investments will be paid as a dividend. Shares can be bought from and sold back to the Fund on any business day in Ireland.

Please refer to the "Investment Objectives and Policies" section of the Prospectus and Fund Supplement for more detailed information.

Risk and Reward Profile

Lower risk ← Higher risk
Potentially lower reward ← Potentially higher reward

- This indicator is based on historical or simulated data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund is ranked in risk and reward category 3 as it invests in bonds, which tend to be more volatile than cash.

The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations).

Investors may not get back the full amount invested. The Fund is also

subject to the following risks which are not included in the calculation of the risk-reward indicator.

The Fund may use derivatives for investment purposes. Derivatives are inherently volatile and a small movement in the price of the underlying investment may result in a large impact on the price of the Fund. Whilst the use of derivatives is not intended to cause larger, more frequent changes in the Fund price or increase its risk profile, the Fund may be exposed to additional risks and costs as a result.

The Fund invests in emerging markets which can be less liquid and riskier than more developed markets and difficulties in accounting, dealing, settlement and custody may arise.

The Fund may hold over 35% of its net asset value in securities of one governmental issuer. The value of the Fund may be profoundly affected if one or more of these issuers fails to meet its obligations or suffers a ratings downgrade.

The Issuer of a debt security held by the Fund may not pay income or repay capital to the Fund when due.

The Fund may invest in instruments which can be difficult to sell when markets are stressed.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	No charge
Exit charge	No charge
Charges taken from the Fund over a year	
Ongoing charges	0.05 %
Charges taken from the Fund under certain specific conditions	
Performance fee	No charge

The ongoing charges figure is based on a combination of the investment management fee, a fixed operating charge and certain other expenses as set for 2019 and may vary from year to year. This figure does not include portfolio transaction costs (other than entry and exit charges, if any, on investments in other collective investment schemes).

For more information about charges please see the “Fees/Charges and Expenses” section of the Prospectus and the Fund supplement.

Past Performance

- Past performance is not a guide to future performance.
- The past performance is calculated in pounds sterling.
- The performance figures include all ongoing charges and exclude any entry charges or exit charges.
- The Fund was launched on 25 May 2007. The Share Class was launched on 25 May 2007.
- The benchmark shown is 3 month sterling Libid.

Practical Information

- The Depositary of the Fund is Northern Trust Fiduciary Services (Ireland) Limited.
- The Fund is subject to the tax rules of Ireland. This may have an impact on your investment. For further details, please consult your financial adviser.
- Insight Global Funds II plc may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the Fund.
- You are entitled to switch from one share class to another, either in the Fund or another sub-fund of the umbrella, provided that you meet all the criteria for that share class set out in the Prospectus. There are no charges for switching although, depending on the destination share class, entry charges as described in the Charges section above may apply.
- Insight Global Funds II plc is an umbrella investment company. The assets of the Fund are segregated from those of other sub-funds in Insight Global Funds II plc. You can find out more information about the umbrella and the Fund in the “Important Information” section of the Prospectus.
