Absolute Insight Emerging Market Debt Fund: Class B2p Sterling Shares A sub-fund of Absolute Insight Funds plc

ISIN: IE00B2QV6M47

This Fund is managed by Insight Investment Management (Europe) Limited

Objectives and Investment Policy

The Fund aims to produce positive absolute returns, comprising both income and capital growth, in all market conditions on a rolling 12 month basis. The Fund's benchmark is 3 month US Dollar Libid and the Fund shall measure its performance against this. In addition the Fund seeks to generate returns of up to 3 month US Dollar Libid + 4% gross of fees over an annualised five year period, whilst being mindful of the 12 month aim. For performance reporting purposes, the share class is measured against the currency equivalent which is 3 month Libid.

The Fund seeks to achieve its objective primarily by investment in a broad range of bonds and derivatives relating to emerging markets.

The Fund primarily invests in investment grade and high yield bonds issued by companies, governments or public international bodies. High yield bonds are generally riskier than investment grade bonds, but in return pay more income. The Fund will also invest in cash and other cash-like investments (including money market instruments). When the Investment Manager cannot identify opportunities likely to produce gains relative to the benchmark, such investment may be significant.

The Fund is actively managed, meaning the Investment Manager has a high level of choice as to how to make investments for the Fund and will pursue a number of different bond- and currency-based emerging market strategies depending upon its views on a number of factors, including

likely changes in the creditworthiness of emerging market bonds, the creditworthiness of particular emerging market bonds relative to other such bonds and the value, or future volatility of, emerging market currencies.

The Investment Manager will use a wide range of derivative instruments. This will usually be where it believes they offer a more effective way of investing than investing directly in a bond, to hedge (or minimise) market and other risks or to otherwise take a short position. Taking a short position means selling something the fund does not own and is a way of still making money when markets are falling. Hedging and short positions are important techniques for producing positive returns in all market conditions.

This Fund may not be appropriate for investors who plan to withdraw their money within five years.

Class B2p Sterling Shares do not pay a dividend. Any income arising is retained in the Fund and reflected in the value of the share class.

Shares can be bought from and sold back to the Fund on any business day in Ireland.

Risk and Reward Profile

Lower risk ← Higher risk
Potentially lower reward Potentially higher reward

- This indicator is based on historical or simulated data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund is ranked in risk and reward category 6 as whilst it does invest in bonds, emerging markets and currencies, which tend to be more volatile than cash, it uses derivatives to attempt to reduce volatility. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. The Fund is also subject to the following risks which are not included in the calculation of the risk-reward indicator.

While efforts will be made to eliminate potential inequalities between Shareholders through the performance fee calculation methodology,

there may be occasions where a shareholder may pay a performance fee for which they have not received a commensurate benefit.

The Fund may use derivatives for investment purposes. Derivatives are inherently volatile and a small movement in the price of the underlying investment may result in a large impact on the price of the Fund. Whilst the use of derivatives is not intended to cause larger, more frequent changes in the Fund price or increase its risk profile, the Fund may be exposed to additional risks and costs as a result.

The Fund invests in emerging markets which can be less liquid and riskier than more developed markets and difficulties in accounting, dealing, settlement and custody may arise.

The Fund may invest in high yield bonds where there is a greater risk to capital and income than a similar investment in government or investment grade bonds. High yield bonds may also be less liquid.

The Fund may hold over 35% of its net asset value in securities of one governmental issuer. The value of the Fund may be profoundly affected if one or more of these issuers fails to meet its obligations or suffers a ratings downgrade.

The Issuer of a debt security held by the Fund may not pay income or repay capital to the Fund when due.

The Fund may invest in instruments which can be difficult to sell when markets are stressed.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest
