Insight Diversified Corporate Bond Fund: Class S Accumulation Shares A sub-fund of Insight Global Funds II plc

ISIN: IE00B46JBX87

This Fund is managed by Insight Investment Management (Europe) Limited

Objectives and Investment Policy

The Fund aims to generate a return, comprising both income and capital growth, by investing primarily in sterling based bonds issued by companies (including financial institutions) located anywhere in the world, but mainly in the UK and Europe. However it will typically also own some bonds, based in sterling or other currencies, issued by governments. The Fund will primarily be invested in investment grade bonds, although there will also be some high yield bonds in the portfolio. High yield bonds are generally riskier than investment grade bonds, but in return pay more income. The Fund's benchmark is iBoxx Sterling Corporate & Collateralised (1% Issuer Cap; 25% Sector Cap) Index. The Fund will also invest in cash and other cash-like investments (including money market instruments) and significant use will also be made of derivatives. This will include circumstances where their use is more efficient than investing directly in bonds. A good example would be to adjust the sensitivity of the portfolio to changes in interest rates. Other examples would be to take views on the volatility of bonds or to take short positions. Taking a short position means selling something the Fund does not own and is a way of still making money when bond

markets are falling. Derivatives can also be used to reduce risk in the portfolio, including any non-base currency risk.

Whilst the Investment Manager will have regard to the likely level of return of any investment relative to the Fund's benchmark (iBoxx Sterling Corporate & Collateralised (1% Issuer Cap; 25% Sector Cap) Index), it will still have a high level of discretion in the selection of investments. It will generally aim to maintain a high degree of diversification by investing across a broad range of fixed income instruments in global credit markets.

This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund's Class S Accumulation Shares do not pay a dividend. Any income arising is retained in the Fund and reflected in the value of the share class. Class S Income Shares are income shares, which means that income from the Fund's investments will be paid as a dividend. Shares can be bought from and sold back to the Fund on any business day in Ireland.

Risk and Reward Profile

Lower risk ← Higher risk
Potentially lower reward ← Potentially higher reward

- This indicator is based on historical or simulated data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund is ranked in risk and reward category 3 as it invests in bonds, which tend to be more volatile than cash. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. The Fund is also

subject to the following risks which are not included in the calculation of the risk-reward indicator.

The Fund may use derivatives for investment purposes. Derivatives are inherently volatile and a small movement in the price of the underlying investment may result in a large impact on the price of the Fund. Whilst the use of derivatives is not intended to cause larger, more frequent changes in the Fund price or increase its risk profile, the Fund may be exposed to additional risks and costs as a result.

The Fund may hold over 35% of its net asset value in securities of one governmental issuer. The value of the Fund may be profoundly affected if one or more of these issuers fails to meet its obligations or suffers a ratings downgrade.

The Issuer of a debt security held by the Fund may not pay income or repay capital to the Fund when due.

The Fund may invest in instruments which can be difficult to sell when markets are stressed.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
