Insight Buy and Maintain Bond Fund: Class B Accumulation Shares A sub-fund of Insight Global Funds II plc

ISIN: IE00B99L4S28

This Fund is managed by Insight Investment Management (Europe) Limited

Objectives and Investment Policy

The Fund aims to generate a return, comprising both income and capital growth, by investing primarily in sterling based bonds issued by companies (including financial institutions) located anywhere in the world, but mainly in the UK and Europe. However it will typically also own some bonds, based in sterling or other currencies, issued by governments. The Fund will seek to invest in investment grade bonds, which are generally less risky than high yield bonds but also pay less income. The Fund's benchmark is iBoxx Sterling Corporate & Collateralised ex-T1&UT2 (1% Issuer Cap; 25% Sector Cap) Index and the Fund will measure its performance against this.

The Fund will also invest in cash and other cash-like investments (including money market instruments).

Significant use will also be made of derivatives. This will include circumstances where their use is more efficient than investing directly in bonds. A good example would be to adjust the sensitivity of the portfolio to changes in interest rates. Derivatives can also be used to reduce risk in the portfolio, including any non-sterling currency risk.

Whilst the investment Manager will have regard to the likely level of return of any investment relative to the Fund's benchmark (iBoxx Sterling

Corporate & Collateralised ex-T1&UT2 (1% Issuer Cap; 25% Sector Cap) Index), the Fund is actively managed and will still have a high level of discretion in the selection of investments. In general, the Investment Manager will look to hold bonds until their maturity. However it will buy and sell bonds in the portfolio where this is necessary, in its view, to materially improve the fund's risk/return profile. A good example would be where, in its opinion, there is a material increase in the probability that a bond in the portfolio will be subject to a default (failure of the bond issuer to repay the principal).

This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund's Class B Accumulation Shares do not pay a dividend. Any income arising is retained in the Fund and reflected in the value of the share class.

It is possible to buy and sell shares in the Fund on the 8th, 15th and 22nd day of each month (or where such is not a business day in Ireland, the next day that is) and the last business day of each month.

Please refer to the "Investment Objectives and Policies" section of the Prospectus and Fund Supplement for more detailed information.

Risk and Reward Profile

Lower risk ← Higher risk
Potentially lower reward ← Potentially higher reward

- This indicator is based on historical or simulated data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund is ranked in risk and reward category 4 as it invests in bonds, which tend to be more volatile than cash.

The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations).

Investors may not get back the full amount invested. The Fund is also

subject to the following risks which are not included in the calculation of the risk-reward indicator.

The Fund may use derivatives for investment purposes. Derivatives are inherently volatile and a small movement in the price of the underlying investment may result in a large impact on the price of the Fund. Whilst the use of derivatives is not intended to cause larger, more frequent changes in the Fund price or increase its risk profile, the Fund may be exposed to additional risks and costs as a result.

The Fund may hold over 35% of its net asset value in securities of one governmental issuer. The value of the Fund may be profoundly affected if one or more of these issuers fails to meet its obligations or suffers a ratings downgrade.

The Issuer of a debt security held by the Fund may not pay income or repay capital to the Fund when due.

The Fund may invest in instruments which can be difficult to sell when markets are stressed.
