Insight Sustainable Euro Corporate Bond Fund: Class A Euro Accumulation Shares A sub-fund of Insight Global Funds II plc

ISIN: IE00BGF9913

This Fund is managed by Insight Investment Management (Europe) Limited

Objectives and Investment Policy

The investment objective of the Fund is to seek to generate total returns, comprising capital growth and income, whilst taking environmental, social and governance (ESG) factors into account. The Fund will seek to achieve its investment objective by investing the majority of its assets in Euro-denominated corporate bonds worldwide, but mainly in the UK and Europe. The Fund may also own bonds issued by governments. The Fund will mainly be invested in investment grade bonds, although there may also be some high yield bonds in the portfolio. High yield bonds are generally riskier than investment grade bonds, but in return pay more income. The Fund's benchmark is Bloomberg Barclays Euro Aggregate Corporate Index. The Fund seeks to outperform its reference benchmark by 0.75% to 1.00% per annum (before tax, fees and expenses) over rolling three year periods.

The Fund may invest in cash and other cash-like investments (including money market instruments). Derivatives will be used for investment purposes, reduction of risk and where it is more efficient to do so than buying the underlying asset.

Whilst the Investment Manager gives regard to the potential return of any investment relative to the Fund's benchmark, Bloomberg Barclays Euro Aggregate Corporate Index, the Fund is actively managed and has a high

level of discretion in the selection of investments. The Fund has internal risk measures in place that help the Fund's active risk to be managed, including an ex-ante tracking error limit, which in normal circumstances is expected to be 3% per annum but may go outside this limit in certain circumstances. The ex-ante tracking error limit is subject to change from time to time and should not be considered to be an assurance or guarantee of the performance of the Fund.

The Fund will seek to identify companies that meet certain minimum standards for ESG factors and may apply additional exclusion criteria. The Fund will use external and/or internal ESG research to evaluate the ESG profile of investments.

This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Class A Euro Accumulation Shares are accumulation shares, which means that rather than being paid as a dividend, income from the Fund's investments is included in the value of the shares.

Shares can be bought from and sold back to the Fund on any business day in Ireland.

Please refer to the "Investment Objectives and Policies" section of the Prospectus and Fund Supplement for more detailed information.

Risk and Reward Profile

Lower risk ← Higher risk
Potentially lower reward Potentially higher reward

- This indicator is based on historical or simulated data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund is ranked in risk and reward category 3 as it invests in bonds, which tend to be more volatile than cash.

The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations).

Investors may not get back the full amount invested. The Fund is also

subject to the following risks which are not included in the calculation of the risk-reward indicator.

The Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.

The Fund may use derivatives for investment purposes. Derivatives are inherently volatile and a small movement in the price of the underlying investment may result in a large impact on the price of the Fund. Whilst the use of derivatives is not intended to cause larger, more frequent changes in the Fund price or increase its risk profile, the Fund may be exposed to additional risks and costs as a result.

The Fund may hold over 35% of its net asset value in securities of one governmental issuer. The value of the Fund may be profoundly affected if one or more of these issuers fails to meet its obligations or suffers a ratings downgrade.

The Issuer of a debt security held by the Fund may not pay income or repay capital to the Fund when due.

The Fund may invest in instruments which can be difficult to sell when markets are stressed.
