Insight Short Dated Buy and Maintain Bond Fund: Class S Accumulation Shares A sub-fund of Insight Global Funds II plc

ISIN: IE00BKTN2474

This Fund is managed by Insight Investment Management (Europe) Limited

Objectives and Investment Policy

The Fund aims to generate a return for investors investing primarily in a portfolio of fixed and floating rate bonds and debt securities, mainly those with a maturity of up to five years, issued by corporates and other commercial issuers and banks. The Fund may also invest in other debt securities such as asset backed securities (ABS), debentures, loan instruments or participations where such are money market instruments, notes and other similar corporate debt instruments. The Fund's benchmark is Markit iBoxx GBP Corporates & Collateralized 0-5 years index and the Fund will measure its performance against this. Corporate debt securities may be acquired with warrants attached. The Fund will mainly seek to invest in debt securities of investment grade quality and may, to a lesser extent, invest in sub-investment grade quality high yield securities. The ABS will be unleveraged and will not embed a derivative element. The ABS are generally secured debt obligations and include residential mortgages, commercial real estate mortgages, secured small business loans, credit card receivables and consumer loans and other types.

The Fund will invest on a worldwide basis. The Fund's Base Currency is Sterling. The Fund may invest in non-Sterling denominated assets which will typically be hedged back into Sterling. The Fund is actively managed meaning the Investment Manager has a high level of discretion as how to make investments for the Fund. The Fund may also use financial derivative instruments (FDIs) for investment purposes as well as for hedging and/or efficient portfolio management purposes. The Fund may not be appropriate for investors who plan to withdraw their money within 5 years. Class S Accumulation Shares do not pay a dividend. Any income arising is retained in the Fund and reflected in the value of the share class. Shares can be bought from and sold back to the Fund on any business day in the United Kingdom. Please refer to the "Investment Objectives and Policies" section of the Prospectus and Fund Supplement for more detailed information.

Risk and Reward Profile

Lower risk ← → Higher risk
Potentially lower reward Potentially higher reward

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund is ranked in risk and reward category 4 as it invests in bonds, which tend to be more volatile than cash. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. The Fund is also

subject to the following risks which are not included in the calculation of the risk-reward indicator.

The Fund may use derivatives for investment purposes. Derivatives are inherently volatile and a small movement in the price of the underlying investment may result in a large impact on the price of the Fund. Whilst the use of derivatives is not intended to cause larger, more frequent changes in the Fund price or increase its risk profile, the Fund may be exposed to additional risks and costs as a result. The Fund may hold over 35% of its net asset value in securities of one governmental issuer. The value of the Fund may be profoundly affected if one or more of these issuers fails to meet its obligations or suffers a ratings downgrade. The issuer of a debt security held by the Fund may not pay income or repay capital to the Fund when due. Subscription for shares in the Fund does not offer the same level of security as investing in a deposit account with a bank. The value of shares is not insured or guaranteed and the principal invested is capable of fluctuation.
