Insight High Grade ABS Fund: Class S (Income) Shares A sub-fund of Insight Global Funds II plc

ISIN: IE00BYNZBR33

This Fund is managed by Insight Investment Management (Europe) Limited

Objectives and Investment Policy

To produce an interest rate-based return by investing in a portfolio of asset-backed securities and corporate floating rate notes. The Fund's benchmark is 1 month SONIA and the Fund will measure its performance against this.

The Fund seeks to achieve its objective primarily by investing in asset-backed securities. An asset-backed security (ABS) is a bond whose returns are derived from and backed by a specified pool of underlying assets. ABS are generally issued by financial institutions and have a variable interest rate.

The Fund may also invest in corporate floating rate notes, which are bonds issued by financial institutions and other companies, also with a variable interest rate.

The majority of the Fund's ABS are backed by pools of European residential mortgages and have the highest possible credit rating of AAA from at least one recognised rating agency at the time of purchase. Other bonds purchased by the Fund will have a rating of at least AA- from at least one recognised rating agency at the time of purchase, or where lower the credit risk will have been hedged by the use of derivatives (see below).

The Fund will also invest in

- cash and other cash-like investments (including money market instruments) and, bearing in mind the benchmark of the Fund, from time to time such investment may be significant, and derivatives.

The Fund is actively managed meaning the Investment Manager has a high level of choice as to how to make investments for the Fund. It will apply a prudent approach to asset selection with the intention of minimising credit risk (risk of loss through the issuer of a bond not being able to repay amounts owing). The Fund is also managed with a focus on liquidity (or cash-flow) and so has a relatively high allocation to short maturity bonds.

Derivatives will primarily be used to minimise exposure to non-sterling currency risk.

The success of these strategies will depend upon the accuracy of the Investment Manager's views. When assessing which bonds to invest in the Investment Manager will have regard the level of total return that they are likely to provide when compared to the Fund's benchmark of 1 month SONIA.

This Fund may not be appropriate for investors who plan to withdraw their money within five years.

Class S (Income) Shares are income shares. This means that income from the Fund's investments will be paid as a dividend.

Shares can be bought from and sold back to the Fund on any business day in Ireland.

Please refer to the "Investment Objectives and Policies" section of the Prospectus and Fund Supplement for more detailed information.

Risk and Reward Profile

- This indicator is based on historical or simulated data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund is ranked in risk and reward category 3 as it invests in bonds, which tend to be more volatile than cash.

The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. The Fund is also

subject to the following risks which are not included in the calculation of the risk-reward indicator.

The Fund may use derivatives for investment purposes. Derivatives are inherently volatile and a small movement in the price of the underlying investment may result in a large impact on the price of the Fund. Whilst the use of derivatives is not intended to cause larger, more frequent changes in the Fund price or increase its risk profile, the Fund may be exposed to additional risks and costs as a result.

The Fund may hold over 35% of its net asset value in securities of one governmental issuer. The value of the Fund may be profoundly affected if one or more of these issuers fails to meet its obligations or suffers a ratings downgrade.

The Fund may invest in high yield bonds where there is a greater risk to capital and income than a similar investment in government or investment grade bonds. High yield bonds may also be less liquid.

The Issuer of a debt security held by the Fund may not pay income or repay capital to the Fund when due.

The Fund may invest in instruments which can be difficult to sell when markets are stressed.
